REQUESTED

Kevin C. Myers  
Senior Engineer  
ARCO Alaska Incorporated  
P.O. Box 360  
Anchorage, Alaska 99510

Dear Mr. Myers:

The Department has reviewed Mr. G. Scott Ronzio's letter received January 19, 1983, requesting modification of Air Quality Control Permit to Operate AQC-470B to include one 14000 horsepower gas-fired turbine and two 5000 horsepower gas-fired turbines in the Kuparuk field. Also reviewed was the information submitted to the U.S. Environmental Protection Agency for a Prevention of Significant Deterioration permit. Based on our review, permit AQC-470B is amended to include the operation of these turbines.

Please include these turbines in the reporting requirements of the Air Contaminant Emission Report and report the days operated and fuel consumption per month for each unit.

The Department of Environmental Conservation regulations provide that any person who disagrees with this decision may request an adjudicatory hearing by filing a statement of issues under 18 AAC 15.200 within thirty (30) days of receipt of this letter. The statement of issues should be mailed to the Commissioner of the Department of Environmental Conservation, Pouch 0, Juneau, Alaska 99811, or delivered to his office at 3220 Hospital Drive in Juneau, Alaska. The filing of a statement of issues may entitle the person to an adjudicatory hearing to contest the decision. Failure to file a statement of issues within thirty days of receipt of this letter shall constitute a waiver of that person's right to judicial review of this decision.

Sincerely,

*for Deena J. Henkins*  
Doug Lowery  
Regional Environmental Supervisor
